Auctioneer phone/email...: _____

Do you want us to include a projector and screen on your quote? Yes _____ /No _____

Please attach a guest seating plan, noting silent and live auction areas, locations of stage, catering, bars, musicians, any other items of interest.

Flamingo Audio's standard auction system includes:

- (2) System techs who deliver, set up, test and operate the system during the auction, and strike it when over.
- (1) Mackie Designs Onyx 1620 16- input main mixer.
- (2) Shure UHF-R professional wireless microphones - one for auctioneer, one for emcee/ auction item reader. We have handheld and Countryman or DPA earset microphones. We always provide a hardwired backup mic.
- (2) Symetrix 528 vocal channel processors.
- (1) Tascam CD-01U Pro CD player and (1) Whirlwind computer interface (laptop audio into auction system).
- (1) Power conditioning system including SurgeX surge protection and Furman voltage regulators.
- (1) All black power and signal cables, routed neatly and secured safely with black gaffer's tape.
- (6) EAW NT series 1,500-watt active speakers, with stands (main seating areas).
- (2) Mackie Designs SRM450 400-watt active speakers, with stands (silent auction areas).
- (1) Mackie Designs SRM350 200-watt active speaker for the auctioneer and recorder's monitor.
- (1) Ashly Protea 4.24C 4x8 digital loudspeaker processor. Routes sound to the different loudspeaker zones, and provides independent control of volume and tone adjustments as needed. This gives us complete control to provide consistently excellent results even in difficult venues and with happy, noisy guests.

Options include:

- Additional rooms or silent auction areas
- 3M X80 4500-lumen XGA projector, adjustable stand.
- Video rack with Denon DVD, JVC SVHS VCR, Kramer scaler/switcher.
- Da-Lite 9'x12' or 6' x 9' Fast-Fold projection screen (front and rear surfaces available).
- Full production services available. Trussing/lighting packages with gear from Jands, Leprecon, ETC, Genie, etc.
